SUMMARY

Full-stack developer and BCA graduate (CGPA 9.08) who builds real-time and AI-powered web applications with React, TypeScript, Node.js, Express, and PostgreSQL/MongoDB, including WebSocket-based collaboration with secured authentication and LangChain + Gemini integrations. Currently interning in project support and QA, finding and fixing bugs, testing releases, and helping shape product features. Eager to grow in backend engineering and AI-driven software development.

EXPERIENCE

Guidance and Project Support Intern — Grudhra Solutions Pvt Ltd *Sep 2026 – Present, Remote*

- Review the product codebase to identify bugs, and fix selected issues in collaboration with teammates
- Perform manual testing and unit testing across multiple testing platforms to verify functionality before release
- Define the feature roadmap and project flow for a product in active development, deciding which features to build and what each should include
- Guide teammates and coordinate day-to-day work in a collaborative team environment

Full Stack Web Development Intern — Zephyr Technologies & Solutions Pvt. Ltd. *Jun 2025, Mangaluru*

- Developed responsive web pages using HTML, CSS, and JavaScript, ensuring cross-device compatibility
- Implemented DOM manipulation to enhance user interactivity and dynamic content updates
- Assisted in backend integration using Node.js and Express.js, gaining exposure to API development and database connectivity
- Built reusable UI components with React.js to streamline frontend development and improve maintainability

PROJECTS

BlockBoard — Project Management Board | GitHub | Live *React, Express, WebSockets, Prisma, PostgreSQL*

- Built a Trello-style collaboration app where users join organizations with role-based membership (Admin/Member) and manage boards, sections, and issues; JWT authentication with bcrypt-hashed passwords
- Implemented real-time sync with a raw ws WebSocket server attached to the Express HTTP server: each board is a room, and creating or editing a section or issue updates every open tab instantly
- Secured the WebSocket handshake by verifying the JWT and the user's organization membership during the HTTP upgrade, rejecting unauthorized connections (401/403/404) before the socket is accepted
- Kept REST as the write path: after each database write the route broadcasts a typed event ({ type, boardId, payload }) to the board's room; the React client de-duplicates events and closes the socket on unmount
- Organized the project as a TypeScript Turborepo monorepo (React 19 + Vite frontend, Express 5 + Bun backend, shared Prisma package) and deployed it on Vercel

Interlix AI | GitHub *React.js, Node.js, Express.js, MongoDB, LangChain, Gemini*

- Built a full-stack interview preparation platform that analyzes a resume against a target job description and generates a match score, skill gaps, and interview prep content
- Added AI-generated aptitude and technical tests, and an AI-refined PDF resume download (Puppeteer)
- Implemented cookie-based JWT authentication, PDF resume parsing, and session history so users can revisit past analyses

Huddle — Real-Time Chat | GitHub | Live *React 19, TypeScript, Bun, WebSockets, Tailwind CSS*

- Built a room-based real-time chat app on a Bun WebSocket server: users create a room, share its server-generated ID, and chat live
- Designed a JSON message protocol with room-scoped broadcasting, join/leave notices, error handling, and automatic room cleanup
- Deployed the frontend on Vercel; the room persists in the URL so a page refresh does not lose the session

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C
Web: React.js, HTML5, CSS3, Tailwind CSS, Vite, Node.js, Express.js, REST APIs, WebSockets
Database & AI: PostgreSQL, Prisma, MongoDB, SQLite, LangChain, Gemini API
Testing & Practice: Manual Testing, Unit Testing, Bug Fixing, Feature Planning
Tools: Git, GitHub, Linux, VS Code, Postman, MS Office (Word, PowerPoint, Excel, Access)
Core CS: DBMS, OS, Computer Networks, OOP, DSA

CERTIFICATIONS

- Web Dev + DevOps Bootcamp (In Progress) — 100xDevs
- Google Cybersecurity Professional Certificate
- The Complete Python Bootcamp: From Zero to Hero

EDUCATION

Bachelor of Computer Applications (BCA) — Alva's Degree College, Moodbidre*2026 | CGPA: 9.08*

Higher Secondary (Class XII) — EBAC - NMPUC Aranthodu, Sullia*2023 | 85.67%*

Secondary Education (Class X) — NMPU Aranthodu, Sullia*2021 | 64.96%*

LEADERSHIP & INVOLVEMENT

- **IT Manager Coordinator, College IT Fest** — Coordinated technical events, managed event logistics, and facilitated communication across multiple teams
- **Core Committee Head, Techotsav (College Technical Fest)** — Led planning and execution of the college's flagship technical fest; managed cross-functional teams
- **Runner-Up, Prompt Engineering Competition at NITTE University** — Placed second applying effective prompt design and problem-solving techniques
- **Farewell Coordinator, College (2024–2025)** — Organized the college farewell event, ensuring effective team coordination
- **Participant, 4+ Hackathons and Intercollege Technical Fests** — Collaborated in teams to design solutions under strict deadlines
